Profile

I solve tough problems by applying a broad skillset developed through more than a half decade of passion for the craft of software engineering and web development.

Skills

Alternative frameworks JavaScript and CSS

Ruby is not just Rails. It became dominant framework, and is something I probably work everyday, but it is not the only Ruby framework out there also I'm working with Sinatra and Grape.

Javascript is very necessary technology for modern websites, I working with BackboneJS, AngularJS and ReactJS. Also I working with JavaScript-based tools such as Bower, Gulp. CSS libraries like Bootstrap and Foundation help me fast develop user interfaces.

Databases

Besides object-relational databases PostgreSQL, MySQL I have experience in using NoSQL database MongoDB, search engine Elasticsearch and key-value storages like Memcached and Redis.

Unix/Dev-ops

I'm a strong UNIX user, Linux or Mac OS X. I love terminal and CLI. Setup and support any arhitecture for big and small projects it's like one, two, three.

Startup and business basics

I have all the necessary knowledge to create a MVP and startups and their optimizations in search engines.
